

Premium Feature: How To Add Content Blocks

To add content blocks to your StarterSite website, please see [How To Add Premium Features To Your StarterSite](#). Once you have completed the checkout process for your new Premium Feature, you are ready to customise your content blocks.

Content blocks allow you to add up to ten images with sections of text. Upload your own images or choose from those previously uploaded to your StarterSite website. Customise your website with the personality and flare you need to wow your website traffic. To begin creating your content blocks, locate the Content Block section from your StarterSite dashboard and click the **Configure now** button.

A popup box will appear with a list of your options for configuring the content blocks for your StarterSite website. Note that in the next section, you have the option to add simple markdown to format your text. For example, you can use italics, bold, headers, subheaders, lists, ordered lists, paragraphs, and links in your text. For more information on Markdown, please see [this knowledgebase article](#).

To begin adding content blocks, toggle the button that asks you if you would like to add content blocks to your StarterSite website to **Yes**. Below the toggle button, you can add a heading for your content block. You will notice that as you type, the preview of your StarterSite will update to show how your website will appear.

Below the heading section, you can also add a strapline, or subheading, to your website. Enter your text into the field provided to add your strapline. The heading and strapline will appear above your content blocks. To add a content block, click the **Add new content block** button.

Would you like to display your Image Blocks on the website?

No

Headline

Strapline

No content blocks added.

You will first be asked to choose an image for your content block. You can upload an image from your computer or choose from your library of previously updated content blocks. Once you have chosen an image, you will be prompted to add a description. Enter the text you would like to appear next to your image into the text box. When you have finished, you can repeat this process to add another content block or click the **Save draft** button.

To preview how your StarterSite will appear, click the **Preview** button. If at any time you want to cancel your changes, simply click the **Cancel** button. Note that you if you click the **Save draft** button, you will also need to update your website with the new changes by clicking the **Publish your StarterSite** button from the StarterSite dashboard.
